Perinatal outcome of dichorionic twins reduced to singletons versus dichorionic twins managed expectantly

P. Calda¹, B. Lipertová¹, I. Podlahová¹, Z. Zizka¹, M. Brestak¹,² Fetal Medicine Center, Department of Obstetrics and Gynaecology, First Faculty of Medicine, Charles University and General University Hospital ¹, Prenatal Diagnostic and Screening Center, ProfiG2, Prague, Czechia ²

Conclusion
Perinatal outcome of twin pregnancies reduced to singletons was statistically significantly better than in expectantly managed twin pregnancies. However, the miscarriage rate of 9% in this cohort must be considered when counseling patients undergoing this procedure.
